Foreword

A wide and dependable statistical information base is essential for all kinds of decision-making processes in any society. To cater for such a need of the Organisation of the Islamic Conference (OIC) Member Countries, the Statistical, Economic and Social Research and Training Centre for Islamic Countries (SESRIC) has been established as a subsidiary organ of the OIC with a multifaceted mandate that includes, in particular, the compilation, processing the dissemination of up-to-date and reliable information and statistics on the major social and economic indicators in the member countries.

Since the establishment in 1978, the Centre has been making strenuous efforts to fulfil this specific task at the highest possible level through the publication of various statistical volumes and series both in hard covers and on its web site. The Statistical Yearbook of the OIC Member Countries is being published since 1980. Up to 2006 publication, the Yearbook consisted of two parts. In the first part, information on indicators which are classified according to major socio-economic areas was provided. Statistical Yearbook 2007 keeps this part and covers the period from 1997 to 2006 for 110 indicators under the categories Demography, Labour Force, Health, Education, Agriculture, Energy, Transportation, Communication, Tourism, Exports, Imports, Public Finance, Money and Prices, National Accounts and International Finance. In the second part some selected key indicators were reported for each of the 57 OIC Member Countries. Statistical Yearbook 2007 keeps this part as well and reports 23 selected key indicators for the period 1997 to 2006. While determining the indicators, availability of data for each Member Country played a crucial role. This year, a new part is included to the Statistical Yearbook. In this part, trends for some of the important indicators are presented mostly in graphical format under two categories; demographic and social trends and economic trends.

The content of Statistical Yearbook is regularly updated and enriched essentially on the basis of information disseminated through the database of the Centre, BASEIND, which is a user friendly system of downloading data in electronic environment. For BASEIND, data is collected from the national statistical sources. However, in some instances, the Centre still has to recourse to the international sources for missing data. In such cases, special care is exercised in choosing the most reliable and updated sources.

Needless to say, the content and quality of any of our statistical publications can only be improved by the constructive participation and active support of our Member Countries. We are indeed regularly approaching the national statistical institutions in these countries for data, publications and all other related information concerning the socio-economic developments in their economies. Response to our queries and questionnaires is very important for our Centre. We would like here to express our thanks and appreciation to all concerned for their cooperation and support and look forward to receiving their feedback and comments that would help us improve this and all other publications.

Population Dynamics

The 57 Member Countries of the OIC inhabit more than one fifth of the total world population, with almost 1.5 billion people in 2006, and their total population is more than those of the member countries of the African Union, the Arab League, the ASEAN, the EU 15 and the OECD (Figure 1).

Figure 1: Population (% of World Total, 2006)

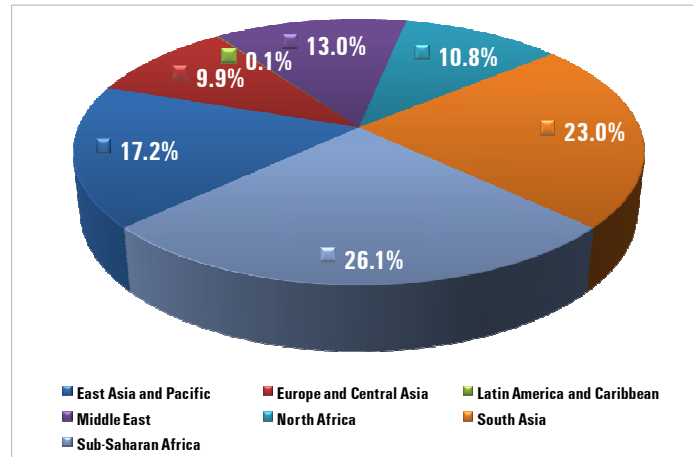

However, distribution of the population within the OIC Member Countries is not uniform. Highly populated countries of the world like Indonesia, Pakistan, Nigeria and Bangladesh, with more than 100 millions of people, and the scarcely populated ones like Maldives, Brunei, Suriname, Comoros, Bahrain, Guyana, Djibouti and Qatar, with less than 1 million, are among the Member Countries (page 14). The geographical distribution¹ of the population within the OIC member countries is such that, as of 2006, the highest percentages were for those located in Sub-Saharan Africa and South Asia, with 26.1% and

¹ **East Asia & Pacific:** Brunei Darussalam, Indonesia, Malaysia • **Europe and Central Asia:** Albania, Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkey, Turkmenistan, Uzbekistan • **Latin America & Caribbean:** Guyana, Suriname • **Middle East:** Bahrain, Iran, Iraq, Jordan, Kuwait, Lebanon, Oman, Palestine, Qatar, Saudi Arabia, Syria, United Arab Emirates, Yemen • **North Africa:** Tunisia, Libya, Morocco, Djibouti, Egypt, Algeria • **South Asia:** Afghanistan, Bangladesh, Maldives, Pakistan • **Sub-Saharan Africa:** Benin, Burkina Faso, Cameroon, Chad, Comoros, Côte d'Ivoire, Gabon, Gambia, Guinea, Guinea-Bissau, Mali, Mauritania, Mozambique, Niger, Nigeria, Senegal, Sierra Leone, Somalia, Sudan, Togo, Uganda.

DEMOGRAPHIC AND SOCIAL TRENDS

23% respectively. On the other hand, the lowest percentage was for those in Europe and Central Asia, 9.9 %, following the ones in Latin America and the Caribbean, where there are only two OIC Member Countries (Figure 2).

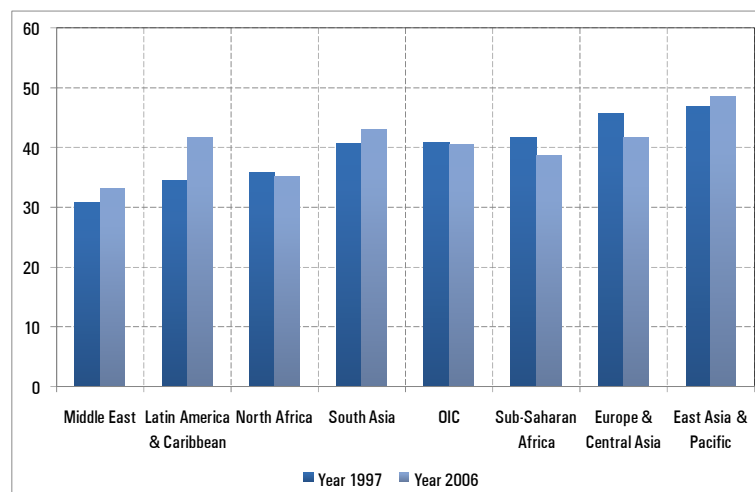

Figure 2: Population Distribution by Regions (% , 2006)

During the last decade, the population of the OIC group increased by 2% annually on the average, which is significantly higher than the world rate of 1.27%. During this period, UAE, Qatar, Afghanistan and Palestine has been the most rapidly growing countries of the OIC. In contrast, in Guyana, Albania, Kazakhstan and Suriname population growth has been the slowest (page 17).

Share of the labour force in total population for the OIC decreased by 0.3 percentage points from 40.9% in 1997 to 40.5% in 2006. At the regional level, while the highest declines were for Europe and Central Asia, and Sub-Saharan Africa, with 4.1 and 3.1 percentage points respectively, the highest increase was for Latin America & the Caribbean, with 7.2 percentage points (Figure 3).

Figure 3: Share of Labour Force in Total Population (%)

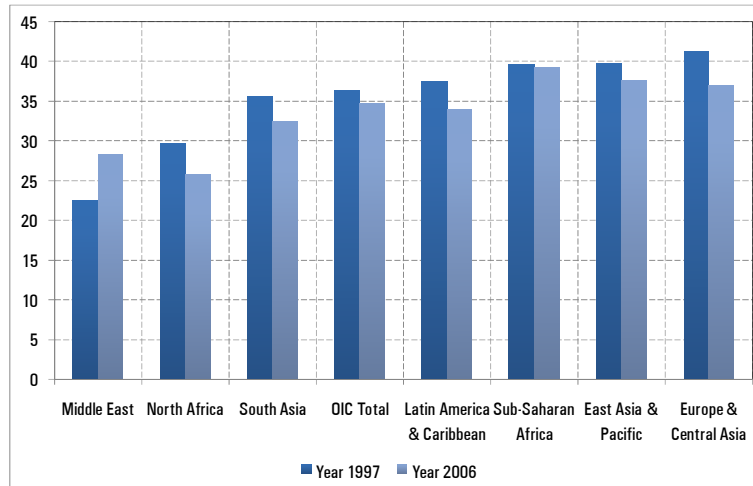

The share of females in total labour force decreased by 1.6 percentage points in the OIC group as a whole from a rate of 36.3% in 1997 to 34.7% in 2006. Declines in

DEMOGRAPHIC AND SOCIAL TRENDS

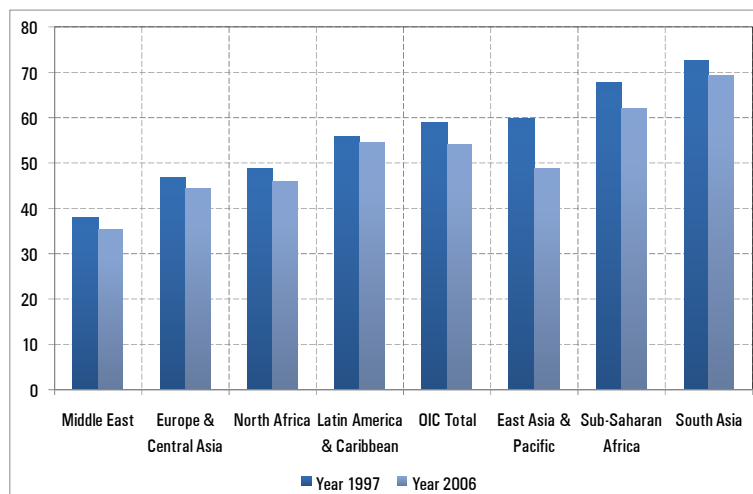

the share of female labour force have been observed in all regions with the exception of Middle East where it increased considerably, by 5.8 percentage points, from 22.5% in 1997 to 28.3% in 2006 (Figure 4).

Figure 4: Share of Females in Total Labour Force (%)

The OIC rural population declined by 4.7 percentage points from 58.9% in 1997 to 54.2% in 2006. At the level of the OIC regions, the highest decline was for East Asia and Pacific, from 59.9% in 1997 to 48.8% in 2006. When Latin America and Caribbean – where there are only two OIC member countries, is set aside, the lowest decline was for Europe and Central Asia, from 46.8% in 1997 to 44.4% in 2006 (Figure 5).

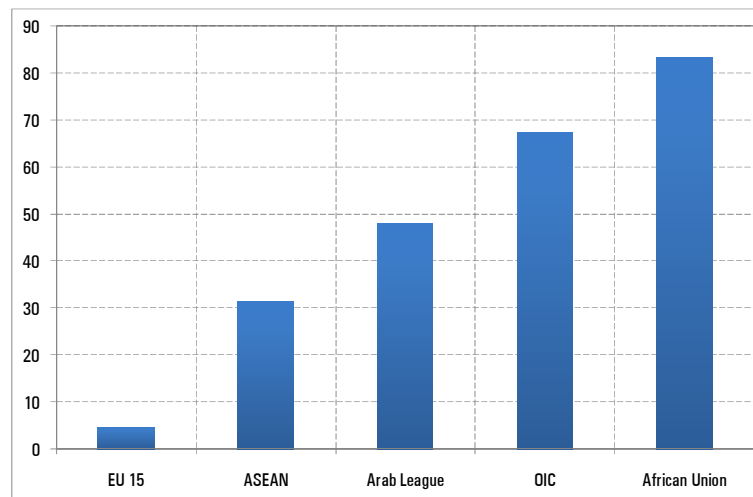

Figure 5: Share of Rural Population (% of Total Population)

Health

One of the major health problems of our time is infant mortality, which is defined as the number of live newborns dying under a year of age per thousand live births. Since all of the OIC Member Countries are either least or medium-developed, it is not surprising that infant mortality rates are high within the group, particularly for the least developed African members. As of 2006, in half of the countries, infant mortality rates were above the world average of 50 per thousand live births (page 21). Comparing the OIC as a group with some other groups shows that the average of infant mortality rate for the OIC Member Countries is lower than that of the African Union, which suffered the highest infant mortality rate in the world (83.2‰ live births, 2006). It is still far above that of the EU15 as well as the ASEAN group and the Arab League. In 2006, almost 68 of every one thousand babies died during their first year of life in the OIC region, while this figure was only about 5 per thousand live births for the EU 15 (Figure 6).

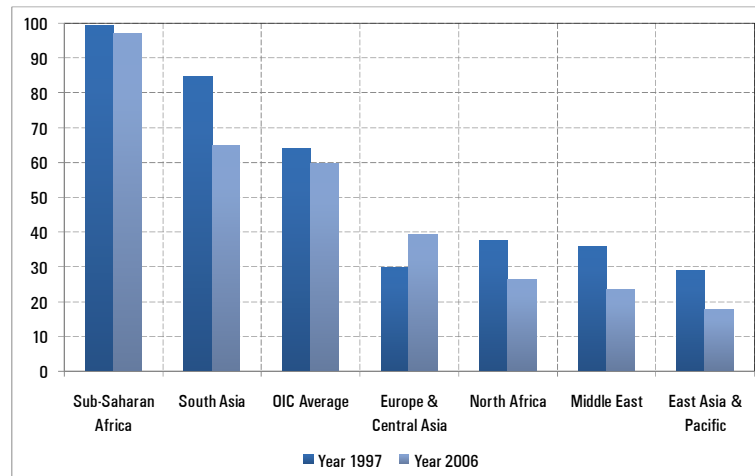

Figure 6: Infant Mortality Rate by Groups of Countries, 2006

Despite the fact that current situation is not very bright, it is still encouraging to see that the average infant mortality rate for the OIC member countries decreased from 64 per thousand live births in 1997 to 60 per thousand live births in 2006 (For meaningful comparison, the averages are calculated only for 44 countries for which data are available in both 1997 and 2006). The highest decline was realized in the UAE, Mozambique and Gabon. At the regional level, all the OIC regions², except Europe and Central Asia, reduced their infant mortality rates (Figure 7).

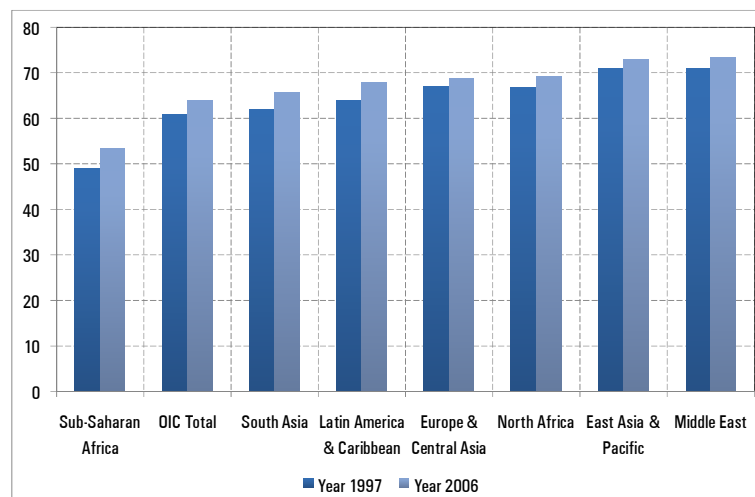

² There is no data for comparison for the member countries in Latin America and Caribbean.

Figure 7: Infant Mortality Rates (Per Thousand) between 1997 and 2006

It is certain that the improvements in infant mortality reflect upon the average life expectancy at birth, since life expectancy at birth is defined as the number of years a newborn infant will live if prevailing patterns of age-specific mortality rates at the time of birth are to stay the same throughout the life. In all the sub-regions of the OIC, including the Sub-Saharan Africa, people are expected to live longer now compared to ten years before. However, the gap between the Sub-Saharan members and the members of the other regions continues to prevail. Even when compared with South Asia, which is the region that has the shortest life expectancy after Sub-Saharan Africa, the Sub-Saharan Africans are expected to live 12 years shorter (Figure 8).

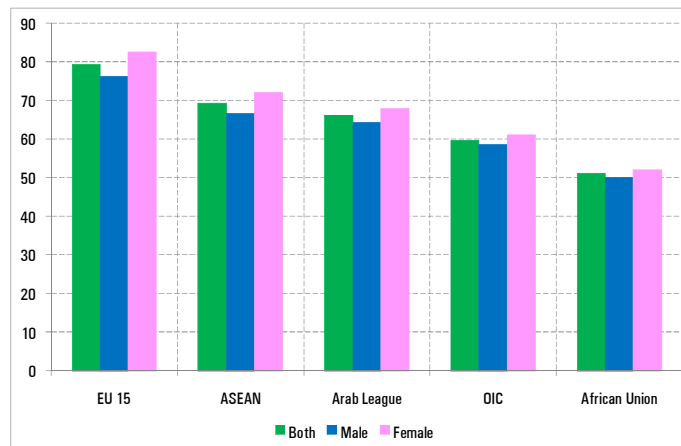

Figure 8: Average Life Expectancy at Birth (Years) between 1997 and 2006

DEMOGRAPHIC AND SOCIAL TRENDS

Although there is an improvement in average life expectancies, as in the case of infant mortality rates, when compared with other relevant groups, the OIC group (60 years) is again better than the African Union (51 years), but worse than the European Union (79 years) as well as the ASEAN group (69 years) and the Arab League (66 years) (Figure 9).

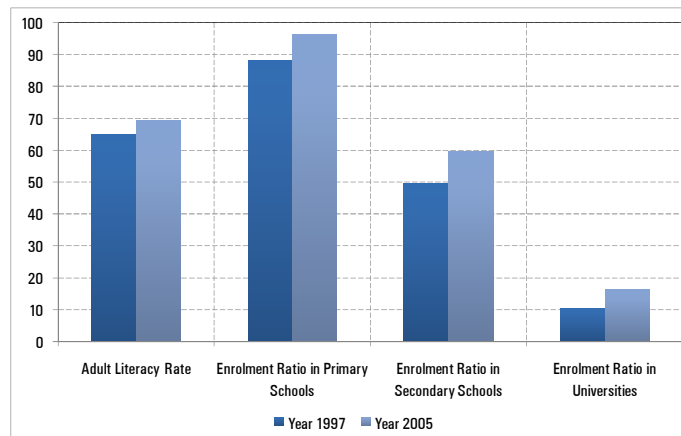

Figure 9: Average Life Expectancy at Birth by Groups of Countries, 2006

Education

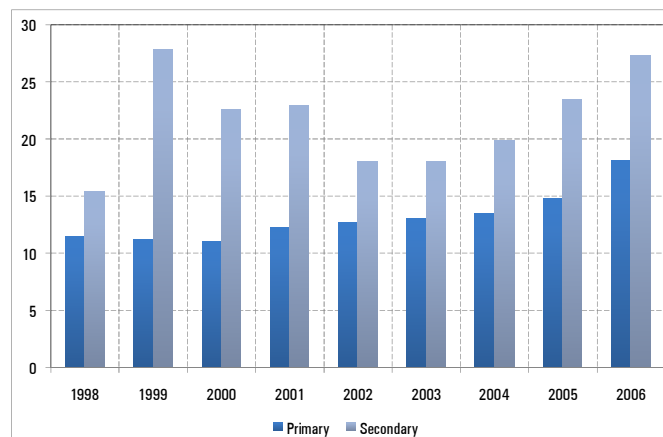

Investment in human capital is regarded as one of the most important determinants of economic growth and an instrument in alleviating poverty and reducing inequality. This investment starts with increasing school enrolments, although, of course, the quality of education is also very important. It can be seen in Figure 10 that enrolment ratios in primary and secondary schools and also in universities increased for the OIC group when these ratios are compared for the years 1997 and 2005. Moreover, adult literacy rate was 65% in 1997 and it increased to 69.2% in 2005, by 4.2 points (Figure 10).

Figure 10: Education Indicators of OIC (Average) between 1997 and 2005

Of course the rate of enrolment ratios for a group of countries is very much related to the expenditure made on education for that group. Expenditure per primary school student as a percentage of GDP per capita for the OIC countries continuously increased during the past decade. It was 11.49% in 1998 and it increased to 18.14% in 2006. Although there are fluctuations for expenditure per secondary school student as a percentage of GDP per capita for the OIC countries throughout these years, there is an improvement when 2006 rate is compared to the 1998 rate, as it increased from 15.44% to 27.31% (Figure 11).

Figure 11: Expenditure per Student (OIC average) between 1998 and 2006

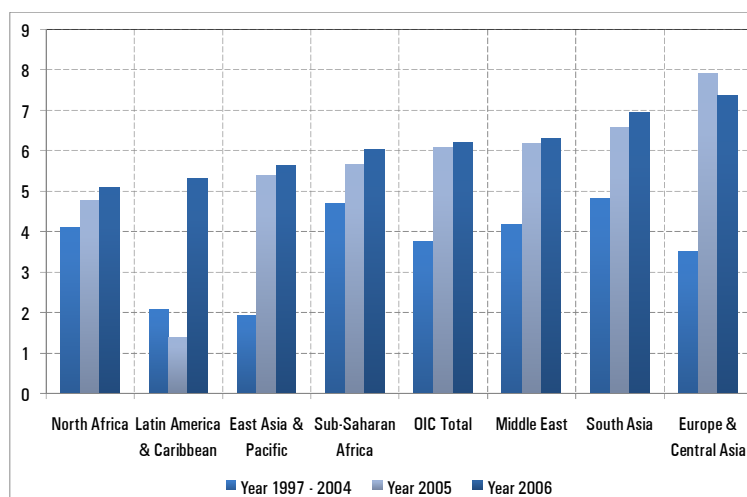

DEMOGRAPHIC AND SOCIAL TRENDS

Growth

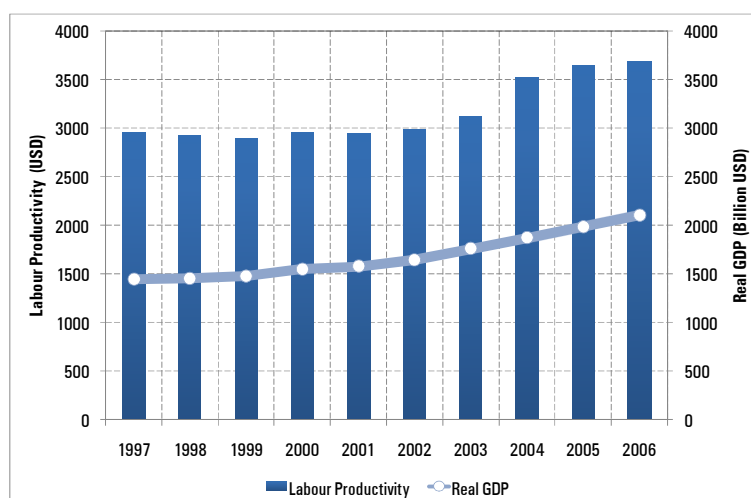

OIC generated 5.6% share of the World total GDP by producing \$2,126 billion in 2006. The annual growth rate for 2005 was 6.1% and 6.2% for 2006. These rates are higher than the average World rates of 4.9% and 5.4% for 2005 and 2006, respectively. Moreover, the annual growth rates in these two years are considerably higher than the average annual growth rate for the period 1997-2004. Although the increase in annual GDP growth of the OIC is induced mainly by the member countries in Europe and Central Asia and South Asia, the OIC countries in other regions also demonstrated similar trends during the period under consideration (Figure 12).

Figure 12: Average Annual Growth Rate of Real GDP between 1997 and 2006 (%)

Beginning from 2003 especially, a rising trend in the labour productivity has also been witnessed. A labourer produced \$2,994 worth of output in 2003, whereas \$3,690 worth of output per labour has been produced in 2006, giving a 25.1% change. This productivity rise contributed to the increasing performance in the real GDP after 2003 (Figure 13).

Figure 13: Labour Productivity and Real GDP (OIC Total) between 1997 and 2006

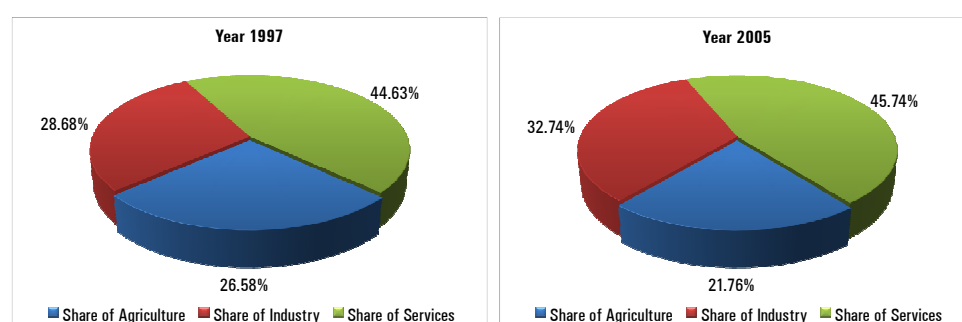

On the other hand, it is hard to say that the employment rates were similarly affected from the pace of real GDP growth. Even with increased output growth, high unemployment rates for OIC member countries continued in this period (page 32).

The Structure of Output

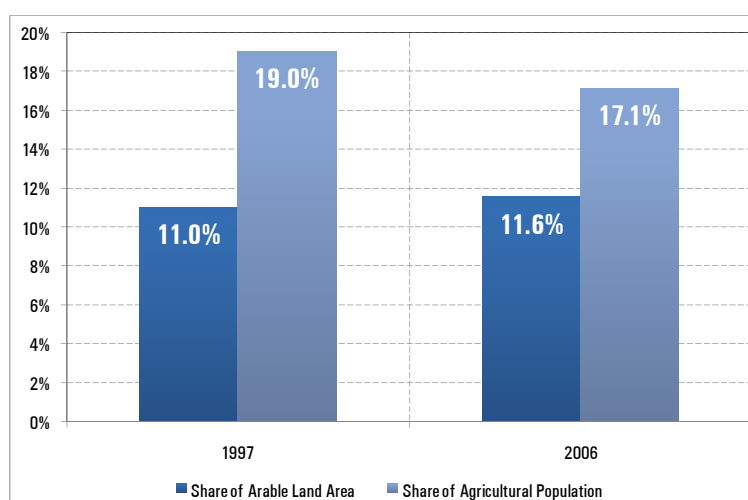

In the past decade, the share of agriculture sector in GDP for the OIC countries declined from 26.6% to 21.8%. On the other hand, the shares of both industry and services sectors increased; the former from 28.7% to 32.7% and the latter from 44.6% to 45.7% (Figure 14). At the country level, the share of agricultural sector declined in 28 of the OIC Member Countries and this decline was above 10% in Nigeria, Uganda, Kyrgyzstan, Mali, Azerbaijan, Iran, Chad and Albania (page 135).

Figure 14: Structure of GDP in the OIC Countries between 1997 and 2005 (%)

Although the share of arable land increased from 11.03% to 11.56% between 1997 and 2007, the share of agricultural population declined from 19.02% to 17.11% during the same period (Figure 15). Moreover, while the percentage of arable land increased in 27 OIC countries, the share of agricultural population declined in all OIC countries, except Algeria, Comoros and Kuwait (page 56).

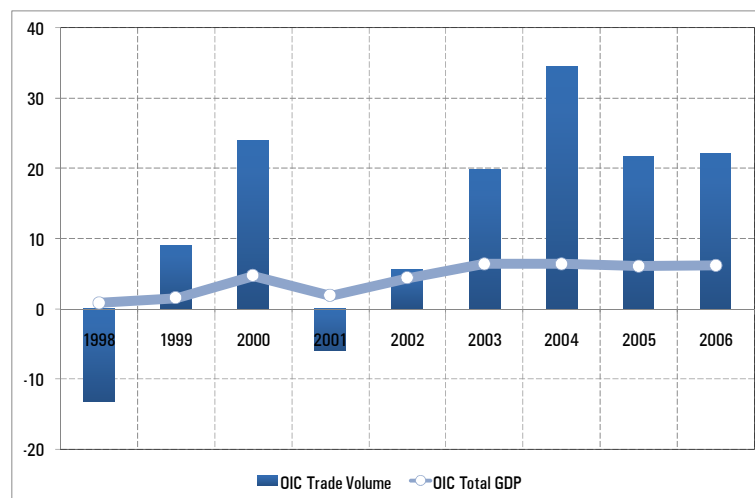

Figure 15: Agricultural Indicators in the OIC Countries between 1997 and 2006

Trade

The growth in production worldwide was accompanied by a rebounding in global trade and investment. The world trade expanded 9.2% in terms of volume of goods and services, while real output increased at a rate of 5.4% in year 2006. Similarly, the trade volume of the OIC group followed a steeper path than the real GDP growth. From 5.62% in 2002, the volume rose to 22% in 2006, recording a large peak at 34.5% in 2004 (Figure 16).

Figure 16: Growth of OIC Real Output and Trade Volume between 1998 and 2006 (%)

On the other hand, the shares of intra-OIC exports in total exports and intra-OIC imports in total imports increased. The share of intra-OIC exports in total exports was 11% in 1997 and it increased to 13.6% in 2006. Similarly, the share of intra-OIC imports in total imports increased from 11.6% to 17.6% (Figures 17 and 18).

Figure 17: Intra-OIC Exports between 1997 and 2006

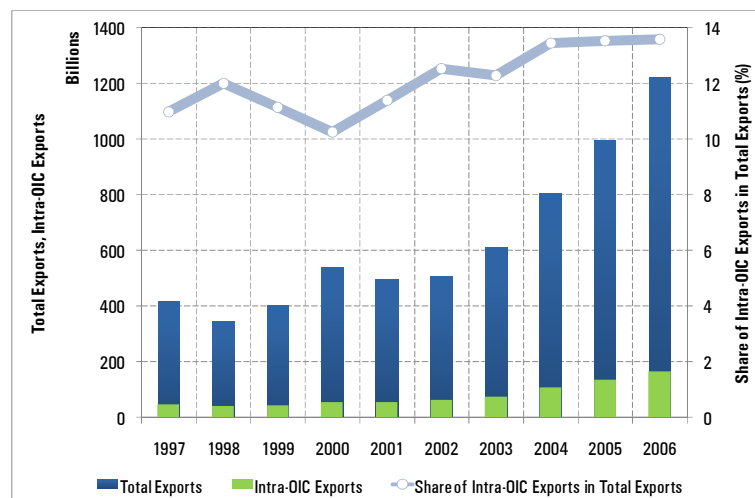

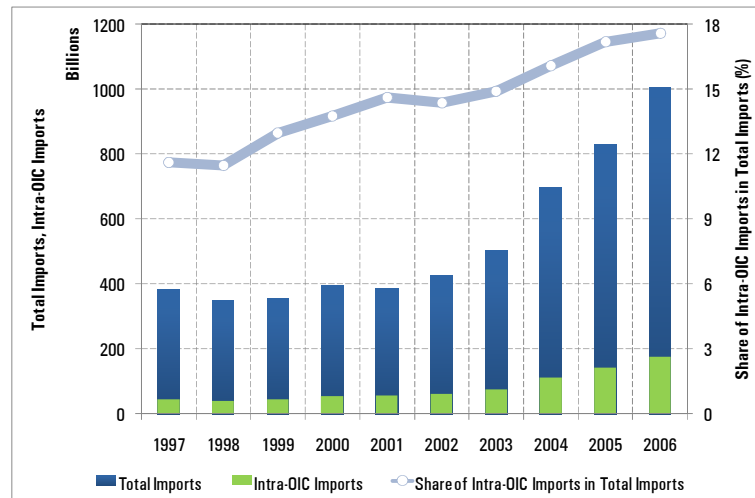

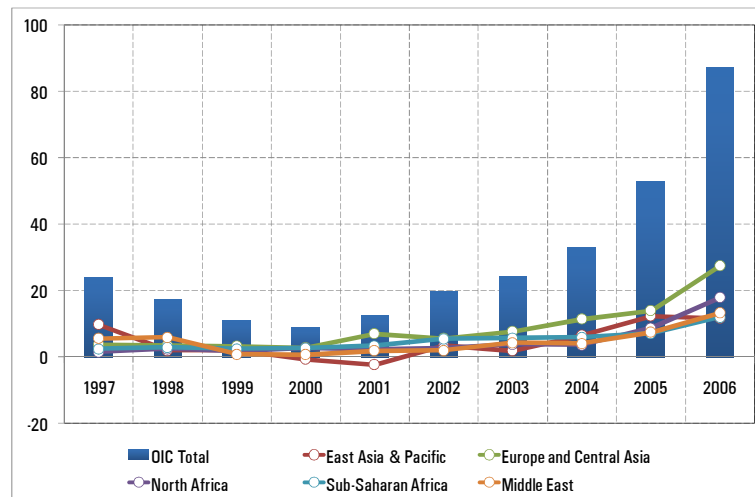

Figure 18: Intra-OIC Imports between 1997 and 2006

The recovery of business and consumer confidence has also contributed positively on investment side, and the decreasing trends in foreign direct investment have been broken since 2000. In the year 2006, the net inflows gradually rose to nearly 10 times of its lowest value (8.7 billion USD in 2000). Within the OIC, for the year 2006, the Europe and Central Asia region attracted 31.4% of the total \$87.2 billion FDI and was followed by the North Africa and Middle East regions, with 20.5% and 15.2% of the bulk, respectively.

**Definitions:
Demography**

Annual Growth Rate of Population

Population growth (annual %) is the exponential change of the population for the period indicated.

Average Life Expectancy at Birth

Number of years a newborn infant would live if the prevailing patterns of mortality at the time of birth were to stay the same throughout his/her life.

Crude Birth Rate

Number of live births occurring during the year per 1,000 persons estimated at midyear.

Crude Death Rate

Number of deaths occurring during the year per 1,000 persons estimated at midyear.

Infant Mortality Rate

Number of infants who die before reaching one year of age per 1,000 live births in a given year.

Natural Growth Rate of Population

It is calculated by subtracting the "Crude Death Rate" from the "Crude Birth Rate".

Share of Rural Population

Share of the total population living in areas defined as rural in each country.

Share of Urban Population

Share of the total population living in areas defined as urban in each country.

Total Midyear Population

It is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship. Refugees not permanently settled in the country of asylum are generally considered part of the population of the country of origin.

Labour Force

**Definitions:
Labour Force**

Active Female Population

All women who supply labour for the production of economic goods and services, as defined by the UN System of National Accounts, during a specified time period.

Active Male Population

All men who supply labour for the production of economic goods and services, as defined by the UN System of National Accounts, during a specified time period.

Share of Females in Labour Force

Share of active female population in total active population.

Share of Males in Labour Force

Share of active male population in total active population.

Total Labour Force

People of ages 15 and older who meet the ILO definition of the economically active population. It includes both the employed and the unemployed.

Unemployment Rate

The share of the labour force that is without work but available for and seeking employment. Definitions of labour force and unemployment differ by country.

Definitions:
Health

Children 1-Year-Old Immunized Against Measles, Percentage

The proportion of 1-year old children (12-23 months) immunized against measles is the percentage of children under one year of age who have received at least one dose of measles vaccine.

Total Fertility Rate

The number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with current age-specific fertility rates.

Tuberculosis Detection Rate under DOTS

The percentage of new infectious tuberculosis cases detected under the directly observed treatment, short course case detection and treatment strategy.

Education

STATISTICAL TABLES

Definitions: Education

Adult Literacy Rate

Percentage of adults aged 15 and above who can, with understanding, read and write a short simple statement about their everyday life.

Enrolment Ratio in Primary Schools

The ratio of total enrolment, regardless of age, to the population of the age group that officially corresponds to the primary education.

Enrolment Ratio in Secondary Schools

The ratio of total enrolment, regardless of age, to the population of the age group that officially corresponds to the secondary education.

Enrolment Ratio in Universities

The ratio of total enrolment, regardless of age, to the population of the age group that officially corresponds to the tertiary education.

**Definitions:
Agriculture**

Fish Catches

Includes both inland water and marine catches.

Number of Chickens

Total number of chickens and roosters.

Number of Tractors

Data generally refer to total wheel and crawler tractors used in agriculture.

Population in Agriculture

All persons depending for their livelihood on agriculture, hunting, fishing and forestry. It comprises all persons economically active in agriculture as well as their non-working dependents. It is not necessary that this referred population exclusively come from rural population.

Production of Fruits

Total production of fruits.

Production of Vegetables

Total amount of vegetable production.

Total Cereal Production

Includes crops harvested for dry grains only.

Total Heads of Sheep

Total number of sheep excluding goats.

Total Meat Production

Meat from animals slaughtered within the national boundaries irrespective of their origin.

Total Poultry Meat Production

Includes meat from all domestic birds and refers, wherever possible, to ready-to-cook weight.

Total Use of Chemical Fertilizers

Total amount of fertilizer consumption.

**Definitions:
Energy**

Production of Crude Oil

A mineral oil consisting of a mixture of hydrocarbons of natural origin, yellow to black in color, of variable specific gravity and viscosity, including crude mineral oils extracted from bituminous minerals.

Production of Electricity

Includes the output of electricity plants designed to produce electricity only, as well as that of combined heat and power plants.

Total Energy Consumption

The use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes minus exports and fuels supplied to ships and aircraft engaged in international transport.

Total Energy Production

Refers to forms of primary energy- petroleum (crude oil, natural gas liquids, and oil from non-conventional sources), natural gas, solid fuels (coal, lignite and other derived fuels), and combustible renewables and waste- and primary electricity, all converted into oil equivalents.

World Marketed Production of Natural Gas

Gases consisting mainly of methane occurring naturally in underground deposits. It includes both non-associated gas and associated gas as well as methane recovered from coalmines and sewage gas.

**Definitions:
Transportation**

Civil Aviation: Passenger-kilometers

Data for total services cover both domestic and international scheduled services operated by airlines registered in each country.

Merchant Shipping: Fleets

Data represent the total volume of all the permanently enclosed spaces of the vessels to which the figures refer. Vessels without mechanical means of propulsion are excluded, but sailing vessels with auxiliary power are included.

Motor Vehicles in Use: Commercial Vehicles

Commercial vehicles include vans, lorries (trucks), buses, tractors and semi-trailers, but exclude farm trailers and tractors and military and police vehicles.

Motor Vehicles in Use: Passenger Cars

All motor vehicles that seat up to nine passengers, in private and public use, except for military and police purposes.

**Definitions:
Communication**

Cellular Mobile Telephone Subscribers

Refers to users of portable telephones subscribing to an automatic public mobile telephone service which provides access to the Public Switched Telephone Network using cellular technology.

Internet Subscribers

The number of Internet subscribers including dial-up, leased lines and broadband.

Internet Users

The number of Internet users.

Main Telephone Lines in Operation per 100 Persons

Main telephone lines refer to the telephone lines connecting a customer's equipment to the Public Switched Telephone Network and which have a dedicated port on a telephone exchange.

Personal Computers

The number of personal computers in use.

Television Receivers

The term "receivers" relates to all types of receivers for broadcasts to the general public, including those connected to a cable distribution system. Private sets installed in public places as well as communal receivers are also included.

**Definitions:
Exports**

Annual Growth Rate of Exports

The percentage change for a one-year period.

Exports to Islamic Countries

Total exports of each OIC member country to other OIC member countries.

Exports to the Rest of the World

Total exports of OIC countries to the rest of the world.

Share of Exports in GDP

It is calculated by dividing the "Total Exports" by the "GDP".

Share of Fuels in Exports

Fuels are defined as SITC group 3 (mineral fuels).

Share of Manufactures in Exports

Manufactures comprise the commodities in SITC groups 5 (chemicals), 6 (basic manufactures), 7 (machinery and transport equipment) and 8 (miscellaneous manufactured goods), excluding division 68.

Share of Non-Fuel Primary Goods in Exports

Non-fuel primary goods are defined as SITC groups 0-2 and 4.

Share of Primary Goods in Exports

Primary goods are defined as SITC groups 0-4.

Total Exports

Data show the f.o.b. value of goods provided to the rest of the world valued in U.S. dollar.

STATISTICAL TABLES

Definitions: Imports

Annual Growth Rate of Imports

The percentage change for a one-year period.

Imports from Islamic Countries

Total imports of each OIC member country from other OIC member countries.

Imports from the Rest of the World

Total imports of OIC countries from the rest of the world.

Share of Fuels in Imports

Fuels are defined as SITC group 3 (mineral fuels).

Share of Imports in GDP

It is calculated by dividing the "Total Imports" by the "GDP".

Share of Manufactures in Imports

Manufactures comprise the commodities in SITC groups 5 (chemicals), 6 (basic manufactures), 7 (machinery and transport equipment), and 8 (miscellaneous manufactured goods), excluding division 68.

Share of Non-Fuel Primary Goods in Imports

Non-fuel Primary Goods are defined as SITC groups 0-2 and 4.

Share of Primary Goods in Imports

Primary goods are defined as SITC groups 0-4.

Total Imports

Data show the c.i.f. value of goods purchased from the rest of the world valued in U.S. dollar.

Definitions:
Public Finance

Balance of Government Budget

It is calculated by subtracting the "Government Expenditures" from the "Government Revenue".

Government Expenditures as Share of GDP

It is calculated by dividing the "Government Expenditures" by the "GDP".

Government Expenditures

They comprise all non-repayable payments by the government whether required or unrequired and whether for current or capital purposes.

Government Revenue

It comprises all non-repayable government receipts, whether required or unrequired other than grants. Revenue is shown as net of refunds and other adjustment transactions.

Share of Taxes in Government Revenue

Share of Total Tax Revenue in Government Revenue.

Total Tax Revenue

Comprise compulsory, unrequited non-repayable receipts collected by central governments for public purposes. It includes interest collected on non-payment or late payment of taxes and is shown as net of refunds and other corrective transactions.

Definitions: Consumer Price Index

Money and Prices

The cost of acquiring a fixed basket of goods and services by the average consumer.

Currency in Circulation

Comprise all banknotes and coins issued by the national central banks and by the central government in some Euro Area countries.

GDP Deflator

The GDP series at current prices is divided by constant price GDP series referenced to 2000. The latter series is constructed by multiplying the 2000 current price GDP level by the GDP volume index (2000=100). The deflator is expressed in index form with 2000=100.

Money Supply: M1 plus Quasi-money

M1 plus quasi-money comprises the sum of currency outside banks, demand deposits other than those of the central government and the time, savings, and foreign currency deposits of resident sectors other than the central government, in national currency unit.

Money Supply: M1

It equals the sum of currency outside deposit money banks and demand deposits other than those of the central government, in national currency unit.

Rate of Inflation: Change in Consumer Prices

The percentage change for a one-year period.

Rediscount Rate: End of Period

Rediscount rate is the rate at which the central banks lend or discount eligible paper for deposit money banks, typically shown on an end-of-period basis.

National Accounts

**Definitions:
National Accounts**

GDP at Current Market Prices in Dollars

At purchaser prices, it is the sum of the gross value-added by all resident and non-resident producers in the economy plus indirect taxes and minus any subsidies not included in the value of the products; in US dollars.

GDP at Current Market Prices

At purchaser prices, it is the sum of the gross value-added by all resident and non-resident producers in the economy plus indirect taxes and minus any subsidies not included in the value of the products; in national currency unit.

GNI at Current Market Prices in Dollars

It is the sum of value-added by all resident producers plus any taxes that are not included in the valuation of output plus net receipts of primary income from non-resident sources, in US dollars.

GNI at Current Market Prices

It is the sum of value-added by all resident producers plus any taxes that are not included in the valuation of output plus net receipts of primary income from non-resident sources, in national currency unit.

Share of Agriculture in GDP

Agriculture corresponds to ISIC divisions 1-5 and includes forestry and fishing.

Share of Industry in GDP

Industry comprises value-added in mining, manufacturing, construction, electricity, water and gas (ISIC divisions 10-45).

Share of Manufacturing in GDP

Manufacturing corresponds to industries belonging to ISIC divisions 15-37

Share of Services in GDP

Services include wholesale, retail trade, restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services corresponding to major divisions 6-9 (ISIC 2).

Total Consumption: Public and Private

Includes all current spending for purchases of goods and services by all levels of government, excluding most government enterprises, in national currency unit.

**Definitions:
International
Finance**

Balance of Payments: Current Account

Current Account Balance is the sum of net exports of goods, services, net income and net current transfers.

Balance of Payments: Trade Balance

Trade balance is calculated by subtracting the "Total Imports" from the "Total Exports".

External Public Debt: Long-Term

Comprise the long-term external obligations of public debtors, including the national government and political subdivisions and autonomous public bodies, and the external obligations of private debtors that are guaranteed for repayment by a public entity.

Foreign Direct Investment

Foreign Direct Investment is defined as investment that is made to acquire a lasting management interest in an enterprise operating in a country other than that of the investor, the investor's purpose being an effective voice in management of the enterprise. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments.

Rate of Change in National Currency against the US Dollar

Annual percentage change in the rate of exchange; end of period.

Rate of Exchange: End of Period

Market rate where available, central bank rate otherwise.

Rate of Exchange: Period Average

The simple arithmetic mean of the monthly figures, which are themselves similar averages of shorter periods.

Total Foreign Exchange Reserves

Holding by monetary authorities of claims on foreigners in the form of bank deposits.
