

Step 1. Download R, open the downloaded file;

- Linux <https://cran.r-project.org/bin/linux/>
- Mac <https://cran.r-project.org/bin/macosx/>
- Windows <https://cran.r-project.org/bin/windows/>

Step 2. Download and Install R-Studio from the link below (choose the R-Studio version that corresponds to your laptop/computer operating system);

<https://www.rstudio.com/products/rstudio/download/#download>

Step 3. Open R-Studio and Install the “RM.weights” package, using the line of code here below,

```
install.packages("RM.weights")
```

```
library(RM.weights)
```
